

# 3D Printing @ MCLS

Experience the joy of 3D printing through Martin County Library System's idea lab!

Where do I start?

- A. Search the web for sharable 3D print files, using popular websites, like:
- Thingiverse
  - Instructables
  - Cults 3D
- B. Or, create your own 3D design. Popular entry-level programs include:
- Tinkercad
  - Blender
  - SketchUp

3D print files should be in .STL file format. Submit your .STL file to Library staff on a USB.

Cost to print is \$0.10/gram. You will be contacted by the Electronic Resource Coordinator to confirm print and estimate cost.

Want to watch your 3D file print? Just let us know!
