Shoreline Stabilization Permits

Native vegetation, Retaining walls, Riprap revetments, Seawalls

- Shoreline re-grading to plant and establish native vegetation
- Review and site inspection for approval of new structures:
Application qualification review. This fee may also be applied to applications that are modified to a living shoreline permit
- Shoreline Stabilization Permit for NEW seawall, retaining wall and/or riprap
Requires application Qualification review and approval as cited above
- Repair or addition – riprap or living shoreline features
- Living Shoreline Permit

1. A separate application is not required to GMD. Residential Land Clearing Page is submitted and reviewed with the building permit application.
2. Alteration of the size, shape, or design of a previously approved preserve requires final approval by the Board of County Commissioners.
3. If not available, signs can be provided by owner/contractor. Alternative sign designs will require Martin County Growth Management Division approval prior to posting. Signs sold by Martin County are the cost of production. Please contact the Growth Management Department for current prices.
