

HOW TO CALCULATE YOUR PREPAYMENT AMOUNT

Prepayment must be 150% of the month's tipping fees, or a minimum of \$100.00. You can submit whatever amount you like keeping in mind that you cannot dump over that amount until your bills are paid.

To calculate your prepayment:

1. Estimate the number of tons of what you are bringing to the landfill (Garbage, Construction and Demolition Debris, Ties, White Goods, Concrete, Yard Trash, etc.).
2. Multiply the number of tons by 1 ½ .
3. Multiply the tons by the rate.

Example:

Construction and Debris Material dumped	20 tons
	<u>x1.5</u>
	30 tons
Rate is \$40.60 per ton	<u>x 40.60</u>
	\$1,218.00

\$1,218.00 would be the minimum prepayment you would need to establish your dumping account.

Example:

Vegetation (yard trash)l dumped	4 tons
	<u>x1.5</u>
	6 tons
Rate is \$24.33 per ton	<u>x24.33</u>
	\$145.98

\$145.98 would be the minimum prepayment you would need to establish your dumping account.
